

DIGITAL SENDER

The equipment being used for e-filing is a Hewlett-Packard Digital Sender. Please follow this link for a complete description.

This unit will scan, and then e-mail documents to the court directly from the unit itself.

The unit must be connected to the institutions LAN network in order to do that. This solution is more cost-effective than buying a new scanner and PC for each institution.

The HP Digital Sender can be set up to require a login and password.
